

SP5650 **OptimusRW™**

The Metrologic OptimusRW WiFi mobile computer provides a rugged solution for real-time data transfer in demanding warehouse and distribution environments.

With an IP rating of 65, OptimusRW can take a slamming and keep on scanning.

This stylish and ergonomic mobile computer integrates with standard wireless (802.11b) networks for long range, real-time data transfer up to 250 meters. It can also handle any batch data collection applications.

OptimusRW features easy navigation and software development tools to make customizing applications for even the toughest data-collection challenges a snap. Optimizer software quickly configures mobile computer programs and DataOptimizer software makes long-range, wireless data transfer to existing databases painless.

OptimusRW symbolizes Metrologic's increased efforts to expand its mobile computer product line. Metrologic will continue to develop products that enhance its hard-earned reputation for excellence.

With the OptimusRW, dusty, damp warehouses never looked so inviting.
